

As part of FarmPEAT's Farmer & Steering Group Day on 23rd October 2023, the project team facilitated group discussions about climate change and management actions on agricultural peat soils. The outputs of these brainstorming sessions are illustrated here.

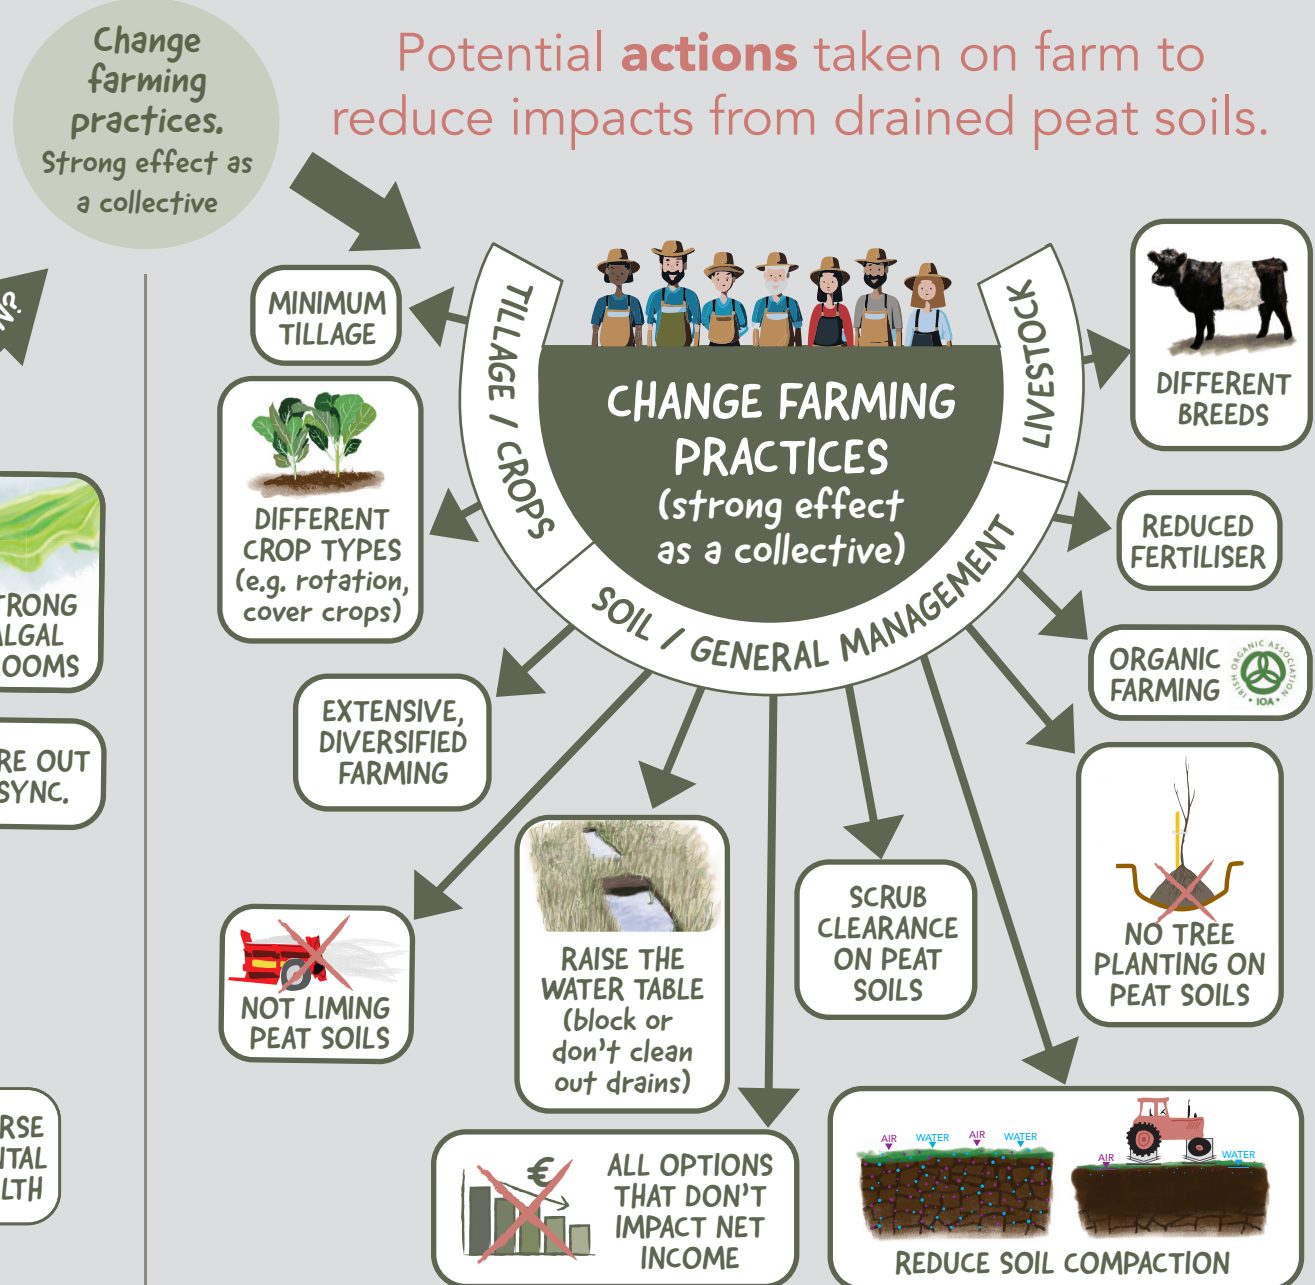

Major **changes** in climate & impacts on farmers.

Q.1 Have you noticed any major changes in climate over the last number of years and how has this impacted you? Do you think you can reduce climate change impacts by how you farm your soils?

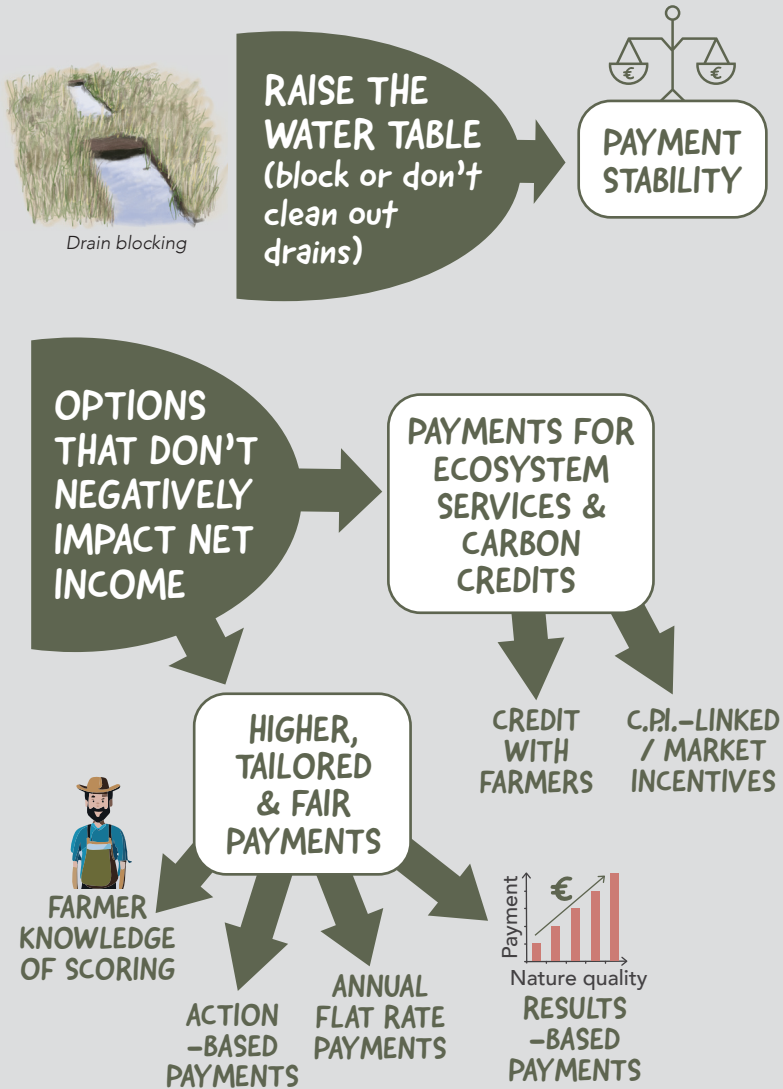

Potential **actions** taken on farm to reduce impacts from drained peat soils.

Q.2 What actions would you be willing to take on your farm to reduce impacts from drained peat soils in a future scheme?

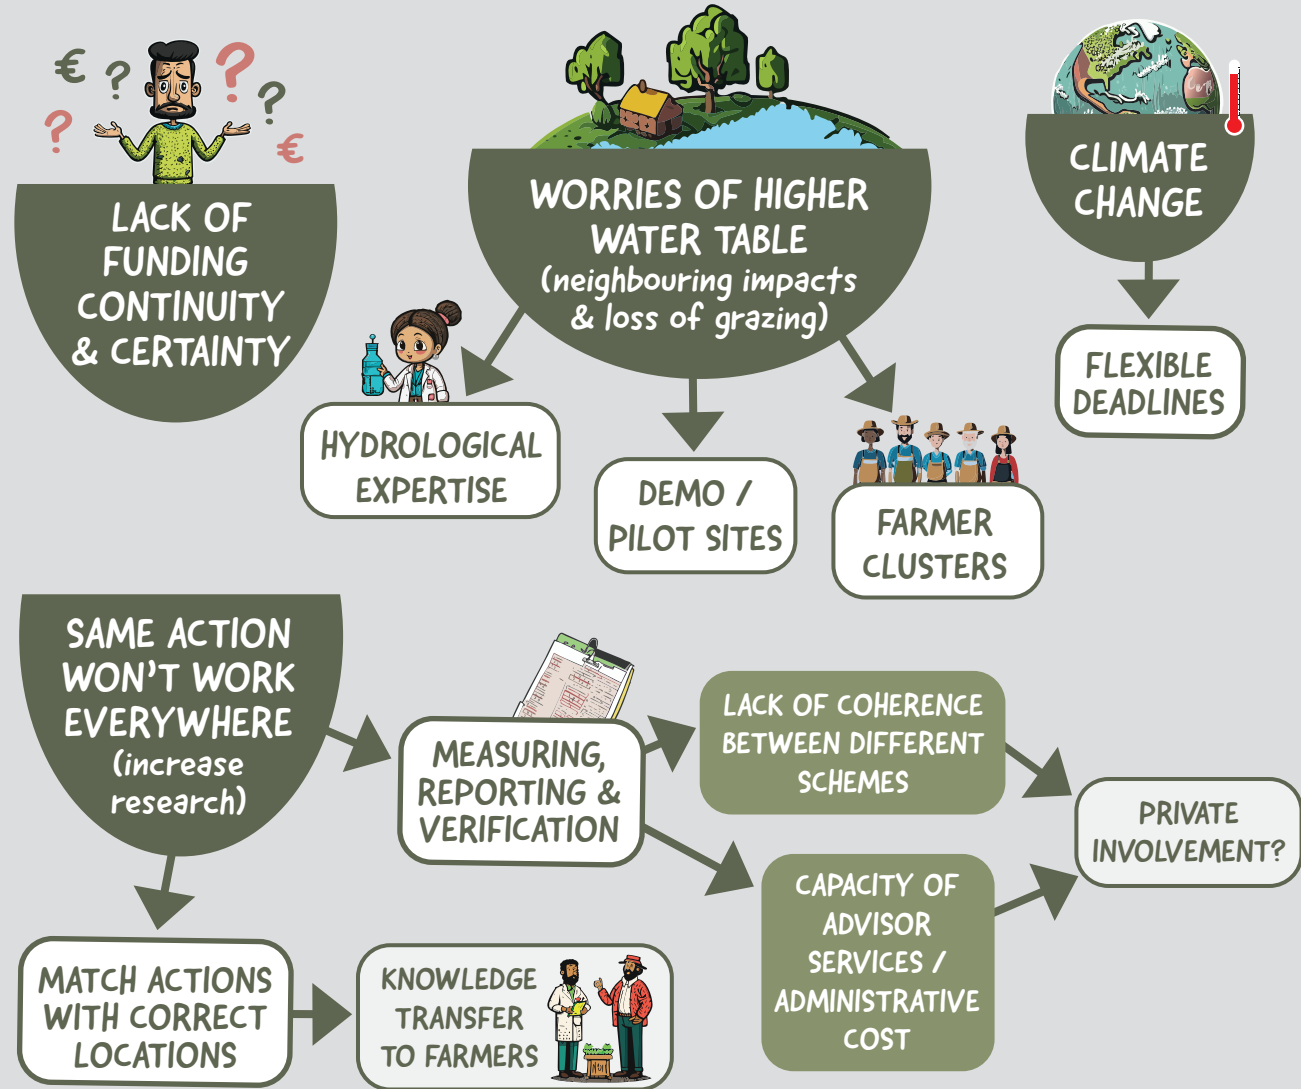

Structure of payments for actions & results.

Q.3 What structure do you think the payments should take for these actions and results?
e.g. timeframe, amounts, number of payments.

Potential pitfalls in agri-environmental schemes for supporting farmers on peat soils.

Q.4 What are the potential pitfalls in agri-environmental schemes in terms of supporting farmers on peat soils?
How can we avoid these pitfalls?
